Pseudodifferential equations on the sphere with spherical splines

Math. Models Methods Appl. Sci. 21, No. 9, 1933-1959 (2011).

MSC Classification: 65N30 65N38 65N15

Keywords: Pseudodifferential equations; Sphere; Spherical splines

Review text:

The authors solve strongly elliptic pseudodifferential equations on the sphere by Galerkin method using spherical splines. The class of equations includes for instance the Laplace-Beltrami equation, Stokes equation, weakly singular integral equations. They derive an optimal convergence rate of the approximation. Some numerical results are presented.
